

# You Never Outgrow Vaccines

**Vaccines are very effective in preventing disease and high costs associated with vaccine-preventable infections, such as:**

**Pneumococcal diseases (Pneumovax): given at ages 65 or older or 18 yrs and older with asthma.**

**Tetanus/diphtheria/pertussis (Tdap): given at ages 11-64 yrs.**

**Meningococcal disease: (Menactra): given at ages 11-18 yrs.**

**HPV (Gardasil): given at ages 9-26 yrs.**

Vaccines are being given at **NO CHARGE** Funding through The N.J. Department of Health & Senior Services & The American Recovery & Reinvestment Act (ARRA)

**If your interested in receiving any of these vaccines please make an appointment today!**

**Participants should bring a copy of their immunization records**

Please call for an appointment
